

SmartSights understands industrial data.

The newly released SmartBundle offers insights on process data that are tailored to the key roles in your organization; from operators, to management, to compliance.

Extend

your reach for mobile access giving users streamlined, focused context to make smart decisions from anywhere.

Improve

productivity with visualization of the data that matters most to you.

Increase

uptime with holistic real-time process views.

Simplify

rationalization of data to focus on the metrics that you need when you need them.

Empower Your Operations

Harnessing the power of WIN-911 & XLReporter, the SmartBundle provides a full field view of your operational insights from anywhere allowing you to make real-time decisions.

Maximize Visibility

SmartFocus with snippets of XLReporter data allowing you to monitor your critical data without having to search.

Simplify Operational Intelligence

Manage performance on processes in real-time and compare historical analytics for data-driven success!

Extend Your Reach

Expand the reach of your HMI with Dashboards that tell the story of your critical data you need when you need it.
