# XLReporter
Operational Reporting.
Elevated.

Your logo here

Real-time industrial reporting.
Rebuilt for modern teams.

XLReporter transforms how your team turns operational data into actionable insights. With 80+ system connectors, on-demand templates, and automated reports, your reports go further, without needing Excel or scripting. Designed for clarity, speed, and mobility.

Built to Fit the Way You Work

From integration to delivery, XLReporter equips teams with the tools to design smarter, access faster, and report with confidence.

Seamless Integration
Easily connects to PLCs, SCADA, historians, SQL, and cloud sources without custom code.

Intelligent Templates
Guided template design with formula support, conditional formatting, and reusable logic.

On-Demand & Scheduled Reports
Generate reports manually or automatically based on time, events, or alarms.

Visual KPIs & Dashboards
Real-time insights into process trends, alarms, and system health.

Multi-Channel Delivery
Distribute reports via SmartSights Mobile, Microsoft Teams, email, printers, or shared folders.

Compliance & Audit-Ready
Track acknowledgment, timestamped logs, and event-driven documentation for ISA-18.2 and IEC 6282.

SmartSights Mobile for XLReporter

You can now take your XLReporter on the go! SmartSights mobile allows you to stay connected with access to interactive reports, improving report navigation and status monitoring.

Built For Any Industry.
Ready For Every Audit.

XLReporter combines raw process data and production targets, supporting both automated and manual data collection. Complete with out-of-the-box templates, XLReporter is tailored for your industry and compliance goals.

Deliver Reports Seamlessly with Microsoft Teams®

XLReporter's integration with Microsoft Teams® means that automated reports can be sent directly to your team's channels. Streamline access to production data and boosting transparency.
